

AZIEL CYCLE · RECEPTION-ANCHORED MODEL

1. RECEPTION ($\cdot\cdot = 1/179$) · Signal Appears

- Awareness begins
- Signal is present, faint
- No action yet, only noticing

Metrics:

- IS low baseline
- RV ~ 0
- TG minimal

State:

- $\cdot$ God is near $\cdot$ = signal detectable

2. RESONANCE ($\cdot\cdot = 3/179$) · Signal Recognized

- Internal alignment begins
- Recognition of truth

Metrics:

- IS rising
- RV positive acceleration
- TG increasing

State:

- $\cdot$ This matters $\cdot$

3. EXPRESSION ($\cdot\cdot = 7/179$) · Signal Becomes Action

- Thought becomes action
- Internal becomes external

Metrics:

- IS peaks
- RV strongest
- TG clearly increasing

State:

- $\cdot$ Move on it $\cdot$

4. PROPAGATION ($\dots / \dots$) · Signal Spreads

- Impact expands beyond origin
- System-level interaction

Layers:

- $\dots$ local
- $\dots$ global

Metrics:

- IS stable high
- RV tapering
- TG high

State:

- $\cdot$ It's no longer just yours $\cdot$

5. DISSOLUTION / INTEGRATION ($\dots / \dots$) · Signal Becomes Structure

- Cycle closes
- Signal embedded into reality

Layers:

- ... inward
- ... outward

Metrics:

- IS stabilizes
- RV · 0
- TG maximum

State:

- ·It is now part of the world·

FULL FLOW:

.. . . . /.../...

Reception · Resonance · Expression · Propagation · Dissolution

KEY INSIGHT:

- While He is near· = Reception window (· phase)
- Signal present
- Alignment possible
- Entry point open

If missed:

- Signal not received
- Cycle stalls

SUMMARY:

God does not leave.

Reception opens and closes.
